

Age Management Masterclass

Final project conferences

in Italy, Austria, Romania, Finland and the Czech Republic

March 2020

During the last month of the project all partners organized final seminars and conferences and proudly shared the final results of our 2 year work. So, what have we produced?

Success stories – age management that works

Here is a list of the great practice examples that have been selected from various EU countries and also an inspiration for your work. Examples are suitable for human resource managers implementing age management measures in their companies. Examples may also serve as a starting point for training, business and business of various educational facilities.

All success stories have been analysed and the results have been processed into the set of recommendations for teams at individual organisational and societal levels. Also the findings and input about the page.

The collection is still under construction and will be completed by May 31, 2021 with 28 success stories of the age management benefits.

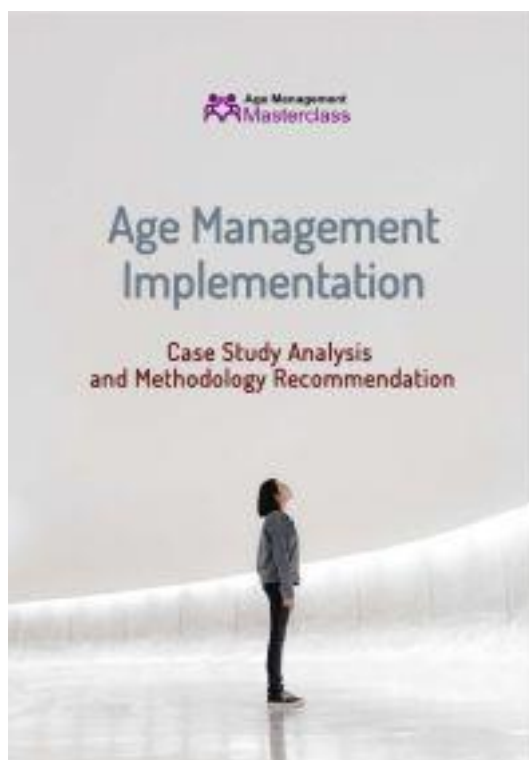

Collection of 28 Success Stories

The project aimed to collect a set of age management examples from several European countries and process them into stories providing inspiration and guidance for age management implementation.

As each success story brings a genuine set of conditions under which the company has to take decisions, the example itself represent a unique learning material for the potential end users, which can be either the age management advisors in the company management system or trainers (in-company trainers working with the employees, or the VET teachers/trainers working with the students and learners in the educational courses). The ultimate objective of the project was providing the insight into the decision making and problem solving processes of the real companies dealing with age-related issues.

Analysis of the Case Studies

The second project output provides a detailed qualitative analysis of all stories and a set of results is outlining possible recommendations for the companies and employers.

VIRTUAL CONFERENCES?

Yes, due to the current situation, some of the conferences had to be held online. However, this did not make them less interesting! The participants were still curious about the stories, process and asked many questions.
